

9DTM

DESIGNED FOR THINKING

Learning creatively and critically through your passion!

What is it?

This is a course where **collaboration**, **creativity**, **communication** and **critical thinking** are at the heart of learning. Experience learning focused on **future focused skills** and **learning to learn**. Focus on your **passions** and **curiosities** to come up with solutions to problems and challenges. Learn how to use the **Design Thinking** process to do this.

This is for you if you are a "**think outside the box**" person, if you're **creative**, **passionate**, **self driven** and a **thinker**. If you enjoy learning through **exploring** and want to be challenged to notice the world around you, this is the course for you.

Who's it for?

How does it work?

Choosing 9DTM as one of your subject choices equals 2 of your 6 subject choices. This means all year your class have one day together to work through your passion project or problem solving.

Signing up

- There are two things you need to do -
1. Choose 9DTM on your subject selection sheet and
 2. Tell us why you think this is the course for you on the back of this sheet. **Hand this in with your enrolment form.**

“

I like how we incorporate group and individual work into DTM. I also like how in DTM you think in a different mind space; thinking of others, not yourself!

Year 9 DTM Student

REMEMBER TO
CHOOSE
9DTM
ON YOUR SUBJECT
SELECTION SHEET!
